What did you like most about the Workshop?

Good variety of topics.
 Interaction time with each presentation.
 March 2008 case study of severe outbreak. Dan Miller & new radar technology, WNC severe weather history.
 An opportunity to learn.
 Number of presenters.
 Short sessions.
 Multiple topics of expertise of presenters.
 I enjoyed all of it.
 Good presentations, good handouts, will recommend.
 The broad spectrum of info that was covered in such detail. Very informative. I really liked the Q & A segment. Also the materials provided to view along with the presentation, very helpful.

What did you like least about the Workshop?

Might have been a little too long, but it was fine.
 Long.
 Weather data.
 Nothing.
 All good, well done.
 The seats.

Please provide any comments you have for the Workshop, ATMS department, and the university.

Faculty and students did an excellent job.
 None.
 A winter weather workshop would be helpful in the fall.
 I would like more information about learning opportunities-including career opportunities.
 Try to do better on recycling lunch waste- ask people to bring cuts, too much trash after but good food.
 Look forward to a severe "winter" weather workshop!

Lunch was satisfactory					2
I am glad I attended the Workshop					2

What did you like most about the Workshop?

A lot of super information, thank you.
Information and resources available.

What did you like least about the Workshop?

I liked it all but some presenters were more enthusiastic than others - though all were knowledgeable!
I think it was too long for me to sit.

Please provide any comments you have for the Workshop, ATMS department, and the university.

Thank you a well-organized, well executed workshop.

2010 UNCA Severe Weather Workshop Evaluation Form

Service during breaks was satisfactory			2	3	11
Lunch was satisfactory			3	3	11
I am glad I attended the Workshop			1	3	12

What did you like most about the Workshop?

Variety of information/speciality.	Networking.	Information.
The presentation and Q & A.	The NESDIS Meteorologist.	
The information from professionals.	Topics discussed.	
Plenty of time to ask questions/mingle.	The information of the presenters.	
Lots of new information and tips.	The variety of speakers.	
The interaction between experts and students/public was nice and informative.		
I really enjoyed the wide range of topics and the organization. The topic all flowed very well and I learned a substantial to talk to meteorology professionals.		

What did you like least about the Workshop?

n/a.	Nothing.	
Some extreme case studies were only addresses, I would have liked everyday examples.		
A somewhat lack of interaction.		
Items/concepts/ideas overlapped a bit. Perhaps begin with the spotter training/severe storm criteria PPT.		
n/a.		
Some presentations were too long-winded.		
Thought that there could have been a little more focus on severe forecasting techniques.		
Having to be nervous presenting! I really enjoyed everything else.		

Please provide any comments you have for the Workshop, ATMS department, and the university.

I want another.		
Winter weather workshop! For the next workshop maybe 1 hr of sitting in front of computer while professional meteorologists go around and help us navigate through NWS products/site/forecast.		
Awesome Workshop, Hands-On.		
Would like a winter weather workshop.		
Loved it. Can wait till the next one?		
Wish we have more events like this. "Winter weather workshop?"

What did you like most about the Workshop?

Presentations were informative and presenters were professional and knowledgeable.
I really enjoyed the presentations. It was a good overall view of severe weather.

What did you like least about the Workshop?

I thought the length of the workshop was a bit too long for one day.
The only thing I didn't like was probably the length. Sorry, it was a great workshop, just a long Saturday.

Please provide any comments you have for the Workshop, ATMS department, and the university.

N/A

I enjoyed having the various groups present and presenting. Maybe have the workshop over 2 days (1/2 days). Maybe during week, maybe more people would attend, that cannot make a weekend.
