

### Syllabus for ATMS 410 – Synoptic Meteorology I – Fall 2023

| Date            | Topic  | Reading/Homework*               |
|-----------------|--|---------------------------------|
| T 22 Aug 2023   | Introduction   | Lecture packet (LP) #1          |
| R 24 Aug        | General Circulation                                  | LP#2                            |
| T 29 Aug        | “  |                                 |
| R 31 Aug        | “  | Project#1                       |
| T 5 Sep         | “  | Quiz#1                          |
| R 7 Sep         | Atmospheric oscillations                             | LP#3, Project#2                 |
| T 12 Sep        | “  |                                 |
| R 14 Sep        | Teleconnections                                      | LP#4, Project#3                 |
| T 19 Sep        | “  | Quiz#2                          |
| R 21 Sep        | “  | Project#4                       |
| T 26 Sep        | Lecture/ review                                      |                                 |
| <b>R 28 Sep</b> | <b>Exam I</b>  | <b>22 Aug – 26 Sep material</b> |
| T 3 Oct         | Kinematics and dynamics                              | LP#5                            |
| R 5 Oct         | “  | Project#5                       |
| R 12 Oct        | “  |                                 |
| T 17 Oct        | Mid-latitude cyclone development                     | LP#6<br>Quiz#3                  |
| R 19 Oct        | “  | Project#6                       |
| T 24 Oct        | “  |                                 |
| R 26 Oct        | “  | Project#7                       |
| T 31 Oct        | “  | Quiz#4                          |
| R 2 Nov         | “  | Project#8                       |
| T 7 Nov         | Lecture/ review                                      |                                 |
| <b>R 9 Nov</b>  | <b>Exam II</b>                                       | <b>3 Oct – 7 Nov material</b>   |
| T 14 Nov        | Mid-latitude cyclone development                     | Project#9                       |
| R 16 Nov        | “  |                                 |
| T 21 Nov        | Three-dimensional structure of mid-latitude cyclones | LP#7                            |
| T 28 Nov        | <i>Undergraduate Research Day</i>                    | <i>no classes</i>               |
| R 30 Nov        | Three-dimensional structure of mid-latitude cyclones |                                 |
| T 5 Dec         | Group presentations                                  | <b>Final Project Report</b>     |

\*assignment completed before class meets on this date

#### Description

A course which examines the causes and effects of mid-latitude synoptic-scale (~2000 km horizontal wavelength) cyclones, the predominant feature on TV weather maps, with a two-fold purpose; (1) to unify the many concepts you have learned while in the atmospheric sciences program and (2) to provide the necessary skills for being a knowledgeable weather forecaster. Although today’s computer weather models are beyond the human forecast capabilities, the human is still a necessary component in the weather forecast loop who can know when the computer models are likely to be in error and use their experience and pattern recognition capabilities to improve the overall operational weather forecast product.

## Student Learning Outcomes

- generate an accurate conceptual model of atmospheric structure and evolution valid on the synoptic-scale
- improve problem-solving skills by applying knowledge to actual weather case studies
- develop an ability to make a significant contribution to a team-based research effort

## Outline

Introduction

General circulation {Carlson, Ch. 5}

Atmospheric oscillations {course notes}

Teleconnections {course notes}

Kinematics and dynamics {Carlson, Ch. 1, 2, 3}

Mid-latitude cyclone development {Carlson, Ch. 4, 10}

Three-dimensional structure of mid-latitude cyclones {Carlson, Ch. 12.1-12.4}

## Grading

|               |             |
|---------------|-------------|
| Projects      | 15%         |
| Quizzes       | 5%          |
| Exam I        | 20%         |
| Exam II       | 20%         |
| Final Exam    | 25%         |
| Final Project | 15%         |
| <b>Total</b>  | <b>100%</b> |

|                          |    |
|--------------------------|----|
| 92% < total score ≤ 100% | A  |
| 90% < total score ≤ 92%  | A- |
| 88% < total score ≤ 90%  | B+ |
| 82% < total score ≤ 88%  | B  |
| 80% < total score ≤ 82%  | B- |
| 78% < total score ≤ 80%  | C+ |
| 72% < total score ≤ 78%  | C  |
| 70% < total score ≤ 72%  | C- |
| 68% < total score ≤ 70%  | D+ |
| 60% < total score ≤ 68%  | D  |
| total score ≤ 60%        | F  |

## Projects

Projects will be assigned throughout the semester and are intended to aid in improving your understanding of the course material contained in the lecture and reading assignments. The first part of each project will involve the analysis of a weather event or scenario using PYGARP or web tools and will require group coordination and response. The second part of each project will involve a “work ‘em out” task whose answers each student will hand in individually. Each group member is *strongly encouraged* to work individually on the weather event or scenario analysis. Students in the past have failed exams because they let others do the work on group projects.

## Quizzes

Quizzes will be given bi-weekly, at the end of the class period on Tuesdays during those weeks when we are in the midst of lecture material (non-exam weeks). Quizzes are given to help the student gauge their understanding of the weekly lecture material and the individual “work ‘em out” questions on the projects. The lowest quiz score will be *dropped* and not count toward the final course grade.

### **Exams I and II**

The mid-term exams (I and II) will be primarily testing new material introduced since the previous exam or since the start of the semester.

### **Final Exam**

The final exam is a *comprehensive* exam in which all the material contained in the entire course is testable.

### **Final Project**

The final project consists of a group project in which each group will serve as a private forecasting company to determine the optimal route for a ship making a hazardous ocean crossing. The project will consist of a written analysis report as well as a presentation defining the optimal route determined by your forecasting company.

### **Assignment/Quiz/Exam Policy**

Assignments are to be handed in before the start of lecture on the date they are due. Assignments handed in after the start of lecture are considered late until 4:30 pm on the day they are due and will have an automatic 10% deduction from their final score. Assignments handed in after 4:30 pm on the day they are due will receive no credit.

Quizzes and Exams are written tests and will be taken on the date they are scheduled, unless circumstances (e.g. medical or loss in the family) warrant. Make-up quizzes and exams for special circumstances may consist of an individual oral graded question and answer session at a mutually agreed upon time outside of the usual class meeting time.

### **Extra Credit**

Participate in the national weather challenge forecast competition (details will be announced soon) and earn *five* points on the ATMS 410 final exam. “Win” the forecast contest for all students enrolled in Synoptic I and earn *seven* points on the final exam. Sign up to give a “Five for Five” discussion and earn *three* points on the ATMS 410 final exam.

---

### **Instructor**

Doug Miller  
232-5158

### **Office of Academic Accessibility**

UNC-Asheville values the diversity of our student body as a strength and a critical component of our dynamic community. Students with disabilities or temporary injuries/conditions may require accommodations due to barriers in the structure of facilities, course design, technology used for curricular purposes, or other campus resources.

Students who experience a barrier to full access to this class should let the professor know, and/or make an appointment to meet with the Office of Academic Accessibility as soon as possible. Learn more about the process of registering, and the services available through the Office of Academic Accessibility here: [accessibility.unca.edu](https://accessibility.unca.edu). Please use this link <https://universityofncasheville.setmore.com/> to schedule an appointment.

While students may disclose disability at any point in the semester, students who receive Letters of Accommodation are strongly encouraged to request, obtain and present these to their professors as early in the semester as possible so that accommodations can be made in a timely manner. It is the student's responsibility to follow this process each semester.

### **Sexual Harassment and Misconduct**

UNC Asheville is dedicated to cultivating and maintaining a safe, respectful, and inclusive environment, free from harassment and discrimination. We strive to ensure that all have equal access to the educational and employment opportunities the University provides. If you or someone you know has been affected by sexual or gender-based harassment, including sexual assault, dating or domestic violence, or stalking, please know that help and support are available. UNC Asheville strongly encourages all members of the community to take action, seek support, and report incidents of sexual harassment to the Title IX Office. You may contact the Title IX Office or Heather Lindkvist, the Title IX Coordinator, directly at 828.232.5658 or at [titleix@unca.edu](mailto:titleix@unca.edu) or learn more by visiting [titleix.unca.edu](https://titleix.unca.edu).

As a faculty member, I am a "responsible employee" and private resource. This means that if you share any information or discuss an incident with me regarding sexual or gender-based harassment, I must disclose this information to the Title IX Coordinator. Our goal is to ensure you are aware of the range of options available to you and have access to the resources you may need.

If you wish to speak with a confidential resource, contact University Health and Counseling Services at 828.251.6520. Off-campus confidential resources include Our Voice (24-Hour Hotline at 828.255.7576) and Helpmate (24-Hour Hotline at 828.254.0516).

### **Academic Alerts**

Faculty at UNC Asheville have access to an Academic Alert system. The purpose of this system is to communicate with students about their progress in courses. Alerts can indicate concerns (e.g., academic difficulty, attendance problems) or reflect on the good work you're doing. Professors use the Alert system because they are invested in student

success and want to encourage open conversations about how students can improve their performance. When a faculty member submits an alert that expresses a concern, the student receives an email from Academic Advising notifying them of the alert. If a student receives three or more alerts, they will need to meet with a Student Success Specialist in the Academic Success Center. The instructor may also request to meet with the student to discuss the alert. It is in the student's best interest to address the alert quickly, as students who do so are more likely to earn credit for the course. Questions about the Academic Alert system can be directed to Anne Marie Roberts ([amrober1@unca.edu](mailto:amrober1@unca.edu)) in the Academic Success Center.

### **University Writing Center**

The University Writing Center (UWC) supports writers in one-on-one sessions lasting 10 to 45 minutes. Consultants can help writers organize ideas, document sources, and revise prose. If you visit the UWC, bring a copy of your assignment, any writing or notes you may have, and the sources you are working with. Make an appointment by visiting [writingcenter.unca.edu](http://writingcenter.unca.edu) and clicking on "Schedule an Appointment," or drop in during open hours Monday-Friday.

### **Academic Honesty**

The university's policy on academic honesty states that "As a community of scholars dedicated to learning and the pursuit of knowledge UNC Asheville relies on the honesty and academic integrity of all the members of its community. Any act of plagiarism or cheating is academic dishonesty. A person who knowingly assists another in cheating is likewise guilty of cheating. According to the instructor's view of the gravity of the offense, a student may be punished by a failing grade or a grade of zero for the assignment or test, or a failing grade in the course. If it seems warranted, the instructor may also recommend to the Provost dismissal or other serious university sanction." I expect that you will exercise integrity in all quizzes, exams, and written assignments. Please email me or pop in during student hours if you have additional questions or need clarification on any point.
