

2017 Western North Carolina Weather Calendar

**Department of Atmospheric Sciences
The university of North Carolina at Asheville
www.atms.unca.edu**

\$8

The 2017 calendar, published by UNC Asheville’s Atmospheric Sciences Department, features 12 months of Asheville climatological data, including monthly temperature and precipitation normals, monthly heating and cooling degree days, plus daily normals for maximum and minimum temperatures. The climatological normals have been completely updated based on the normals recently published by the NOAA’s National Centers for Environment Information (NCEI) for the period of 1981-2010.

This 31st (and the very last) annual WNC Weather Calendar also includes moon phases, daily sunrise and sunset times, and a climatological data table of normals, means, and extremes for Asheville updated to September 2016.

The cost of the calendar is \$8 including postage. Please make checks payable to “Weather Calendar” and mail to Alex Huang, ATMS, UNC Asheville, CPO 2450, One University Heights, Asheville, NC 28804-8511
