

ADVANCED SKYWARN SPOTTER TRAINING

Thursday, 12 April 2012 at 7:00 p.m.
Robinson Hall, Room 125

Presented by:

Justin Lane, Greenville–Spartanburg National Weather Service Forecast Office
UNCA Department of Atmospheric Sciences

OAR/ERL/National Severe Storms Laboratory (NSSL)

SKYWARN storm spotters are part of the ranks of citizens who form the nation's first line of defense against severe weather. SKYWARN volunteers help keep their local communities safe by providing timely and accurate reports of severe weather to the National Weather Service. Although SKYWARN spotters provide essential information for all types of weather hazards, the main responsibility of a SKYWARN spotter is to identify and describe severe local storms. This class is open to the public. Representatives from emergency response agencies, amateur radio operators, and interested citizens are encouraged to attend.

SKYWARN

This class is *free* for all students, faculty, staff, and members of the public.
Please RSVP to cgodfrey@unca.edu.
